Atlanta, GA 12345

Re: 1996 Georgia Periodic Emission Inventory

Dear Mr. Smith:

The Georgia Environmental Protection Division (EPD) requests your assistance in the development of a 1996 Periodic Emission Inventory. The emissions of volatile organic compounds (VOC), nitrogen oxides (NO_x), and carbon monoxide (CO) into the air in and around the Atlanta metropolitan area have caused violations of the National Ambient Air Quality Standards for ozone. Subsequently, the Clean Air Act (CAA) requires Georgia to submit an emissions inventory of these ozone precursors for 1996 for the Atlanta ozone nonattainment area. The EPD will calculate the point source component of this inventory from information submitted by major sources of ozone precursors in and around the Atlanta area using the enclosed questionnaire.

Per Georgia Rules for Air Quality Chapter 391-3-1-.02(6)(b)1.(I), please complete the questionnaire and return to the address shown below by August 14. Information reported should represent 1996 operational and emissions data. You may refer to VOC record keeping or other monitoring data for process information.

The EPD will hold two workshops for facilities needing assistance in completing the questionnaire. The workshops will be held on August 5 at 10:00 a.m. and 2:00 p.m. in the Training Room at EPD's offices on 4244 International Parkway in Atlanta. Staff will provide instruction on each form in the questionnaire and will answer any questions. Please R.S.V.P. to the contact provided in the following paragraph.

EPD has contracted E. H. Pechan & Associates to support the data collection and inventory preparation effort. Please direct any questions you have to _____ of Pechan at (919) 123-1234 x123 or by E-mail at _____@abcdef.com. Thank you in advance for your cooperation.

Sincerely,

The Georgia Environmental Protection Division (EPD) requests your assistance in the development of a 1996 Periodic Emission Inventory. The emissions of volatile organic compounds (VOC), nitrogen oxides (NO_x), and carbon monoxide (CO) into the air in and around the Atlanta metropolitan area have caused violations of the National Ambient Air Quality Standards for ozone. Subsequently, the Clean Air Act (CAA) requires Georgia to submit an emissions inventory of these ozone precursors for 1996 for the Atlanta ozone nonattainment area. The EPD will calculate the point source component of this inventory from information submitted by major sources of ozone precursors in and around the Atlanta area using the enclosed questionnaire.

Per Georgia Rules for Air Quality Chapter 391-3-1-.02(6)(b)1.(I), please complete the questionnaire and return to the address shown below by August 14. Information reported should represent 1996 operational and emissions data. You may refer to VOC record keeping or other monitoring data for process information.

The EPD will hold two workshops for facilities needing assistance in completing the questionnaire. The workshops will be held on August 5 at 10:00 a.m. and 2:00 p.m. in the Training Room at EPD's offices on 4244 International Parkway in Atlanta. Staff will provide instruction on each form in the questionnaire and will answer any questions. Please R.S.V.P. to the contact provided in the following paragraph.

EPD has contracted E. H. Pechan & Associates to support the data collection and inventory preparation effort. Please direct any questions you have to Casey Walvoord of Pechan at (919) 493-3144 x110 or by E-mail at cwalvoord@pechan.com. Thank you in advance for your cooperation.

The emissions of volatile organic compounds (VOC), nitrogen oxides (NO_x), and carbon monoxide (CO) into the air in and around the Atlanta metropolitan area have caused violations of the National Ambient Air Quality Standards for ozone. Subsequently, the Clean Air Act (CAA) requires Georgia to submit an emissions inventory of these ozone precursors for 1996 for the Atlanta ozone nonattainment area. The EPD will calculate the point source component of this inventory from information submitted by major sources of ozone precursors in and around the Atlanta area using the enclosed questionnaire.

Per Georgia Rules for Air Quality Chapter 391-3-1-.02(6)(b)1.(I), please complete the questionnaire and return to the address shown below by August 14. Information reported should represent 1996 operational and emissions data. You may refer to VOC record keeping or other monitoring data for process information.

The EPD will hold two workshops for facilities needing assistance in completing the questionnaire. The workshops will be held on August 5 at 10:00 a.m. and 2:00 p.m. in the Training Room at EPD's offices on 4244 International Parkway in Atlanta. Staff will provide instruction on each form in the questionnaire and will answer any questions. Please R.S.V.P. to the contact provided in the following paragraph.

EPD has contracted E. H. Pechan & Associates to support the data collection and inventory preparation effort. Please direct any questions you have to Casey Walvoord of Pechan at (919) 493-3144 x110 or by E-mail at cwalvoord@pechan.com. Thank you in advance for your cooperation.

The emissions of volatile organic compounds (VOC), nitrogen oxides (NO_x), and carbon monoxide (CO) into the air in and around the Atlanta metropolitan area have caused violations of the National Ambient Air Quality Standards for ozone. Subsequently, the Clean Air Act (CAA) requires Georgia to submit an emissions inventory of these ozone precursors for 1996 for the Atlanta ozone nonattainment area. The EPD will calculate the point source component of this inventory from information submitted by major sources of ozone precursors in and around the Atlanta area using the enclosed questionnaire.

Per Georgia Rules for Air Quality Chapter 391-3-1-.02(6)(b)1.(I), please complete the questionnaire and return to the address shown below by August 14. Information reported should represent 1996 operational and emissions data. You may refer to VOC record keeping or other monitoring data for process information.

The EPD will hold two workshops for facilities needing assistance in completing the questionnaire. The workshops will be held on August 5 at 10:00 a.m. and 2:00 p.m. in the Training Room at EPD's offices on 4244 International Parkway in Atlanta. Staff will provide instruction on each form in the questionnaire and will answer any questions. Please R.S.V.P. to the contact provided in the following paragraph.

EPD has contracted E. H. Pechan & Associates to support the data collection and inventory preparation effort. Please direct any questions you have to Casey Walvoord of Pechan at (919) 493-3144 x110 or by E-mail at cwalvoord@pechan.com. Thank you in advance for your cooperation.

NIX & MILLER, INC.
P. O. BOX 587
BUFORD, GA 30518

Re: 1996 Georgia Periodic Emission Inventory

Dear MARK GRAVES:

The Georgia Environmental Protection Division (EPD) requests your assistance in the development of a 1996 Periodic Emission Inventory. The emissions of volatile organic compounds (VOC), nitrogen oxides (NO_x), and carbon monoxide (CO) into the air in and around the Atlanta metropolitan area have caused violations of the National Ambient Air Quality Standards for ozone. Subsequently, the Clean Air Act (CAA) requires Georgia to submit an emissions inventory of these ozone precursors for 1996 for the Atlanta ozone nonattainment area. The EPD will calculate the point source component of this inventory from information submitted by major sources of ozone precursors in and around the Atlanta area using the enclosed questionnaire.

Per Georgia Rules for Air Quality Chapter 391-3-1-.02(6)(b)1.(I), please complete the questionnaire and return to the address shown below by August 14. Information reported should represent 1996 operational and emissions data. You may refer to VOC record keeping or other monitoring data for process information.

The EPD will hold two workshops for facilities needing assistance in completing the questionnaire. The workshops will be held on August 5 at 10:00 a.m. and 2:00 p.m. in the Training Room at EPD's offices on 4244 International Parkway in Atlanta. LOUISIANA-PACIFIC CORP
10910 COMMERCE ROAD
ATHENS, GA 30607

Re: 1996 Georgia Periodic Emission Inventory

Dear TROY BROWN:

The Georgia Environmental Protection Division (EPD) requests your assistance in the development of a 1996 Periodic Emission Inventory. The emissions of volatile organic compounds (VOC), nitrogen oxides (NO_x), and carbon monoxide (CO) into the air in and around the Atlanta metropolitan area have caused violations of the National Ambient Air Quality Standards for ozone. Subsequently, the Clean Air Act (CAA) requires Georgia to submit an emissions inventory of these ozone precursors for 1996 for the Atlanta ozone nonattainment area. The EPD will calculate the point source component of this inventory from information submitted by major sources of ozone precursors in and around the Atlanta area using the enclosed questionnaire.

Per Georgia Rules for Air Quality Chapter 391-3-1-.02(6)(b)1.(I), please complete the questionnaire and return to the address shown below by August 14. Information reported should represent 1996 operational and emissions data. You may refer to VOC record keeping or other monitoring data for process information.

The EPD will hold two workshops for facilities needing assistance in completing the questionnaire. The workshops will be held on August 5 at 10:00 a.m. and 2:00 p.m. in the Training Room at EPD's offices on 4244 International Parkway in Atlanta. Staff will provide instruction on each form in the questionnaire and will answer any questions. Please R.S.V.P. to the contact provided in the following paragraph.

CEDARTOWN, GA 30125

Re: 1996 Georgia Periodic Emission Inventory

Dear STEPHEN AARON:

The Georgia Environmental Protection Division (EPD) requests your assistance in the development of a 1996 Periodic Emission Inventory. The emissions of volatile organic compounds (VOC), nitrogen oxides (NO_x), and carbon monoxide (CO) into the air in and around the Atlanta metropolitan area have caused violations of the National Ambient Air Quality Standards for ozone. Subsequently, the Clean Air Act (CAA) requires Georgia to submit an emissions inventory of these ozone precursors for 1996 for the Atlanta ozone nonattainment area. The EPD will calculate the point source component of this inventory from information submitted by major sources of ozone precursors in and around the Atlanta area using the enclosed questionnaire.

Per Georgia Rules for Air Quality Chapter 391-3-1-.02(6)(b)1.(I), please complete the questionnaire and return to the address shown below by August 14. Information reported should represent 1996 operational and emissions data. You may refer to VOC record keeping or other monitoring data for process information.

The EPD will hold two workshops for facilities needing assistance in completing the questionnaire. The workshops will be held on August 5 at 10:00 a.m. and 2:00 p.m. in the Training Room at EPD's offices on 4244 International Parkway in Atlanta. Staff will provide instruction on each form in the questionnaire and will answer any questions. Please R.S.V.P. to the contact provided in the following paragraph.

LAGRANGE, GA 30240

Re: 1996 Georgia Periodic Emission Inventory

Dear RICHARD BAKER:

The Georgia Environmental Protection Division (EPD) requests your assistance in the development of a 1996 Periodic Emission Inventory. The emissions of volatile organic compounds (VOC), nitrogen oxides (NO_x), and carbon monoxide (CO) into the air in and around the Atlanta metropolitan area have caused violations of the National Ambient Air Quality Standards for ozone. Subsequently, the Clean Air Act (CAA) requires Georgia to submit an emissions inventory of these ozone precursors for 1996 for the Atlanta ozone nonattainment area. The EPD will calculate the point source component of this inventory from information submitted by major sources of ozone precursors in and around the Atlanta area using the enclosed questionnaire.

Per Georgia Rules for Air Quality Chapter 391-3-1-.02(6)(b)1.(I), please complete the questionnaire and return to the address shown below by August 14. Information reported should represent 1996 operational and emissions data. You may refer to VOC record keeping or other monitoring data for process information.

The EPD will hold two workshops for facilities needing assistance in completing the questionnaire. The workshops will be held on August 5 at 10:00 a.m. and 2:00 p.m. in the Training Room at EPD's offices on 4244 International Parkway in Atlanta. Staff will provide instruction on each form in the questionnaire and will answer any questions. Please R.S.V.P. to the contact provided in the following paragraph.
